- **Reference marking** with figures or special signs
- **Marking of weight, volume indications, etc.**

The strips can be rotated individually with the knobs on the side; a ratchet system ensures fast and accurate character alignment.

To simplify marking, the devices with character height 40 and 50 mm are fitted with 2 side handles.

- **Standard models**

Their strips have the 10 digits from 0 to 9.

- **Special models**

They have one or more strips with digits, letters or signs, with a maximum of 2 identical characters per strip.

We can supply any graphic upon request, after creating a tool.

The industrial numberers are inked on Plastic-ink No. 3 or No. 4 ink pads (absorbent supports) or on the felt ink pads in plastic or metal boxes (non-absorbent supports).

Character height	True width spacing	Number of strips
20 mm	1 2 3 4	3 - 4 - 5 6 - 8
30 mm	1 2 3	3 - 4 - 5 6 - 8 - 10
40 mm	1 2	3 - 4 5 - 6
50 mm	1 2	4 - 5 - 6
