

PERMANENT STAMPS

These metalloplastic stamps, with fixed texts, without frame, are flat or curved.

Above 250 cm², they are equipped with an interlayer foam sheet to facilitate marking.

Stamps on wooden frame

- Composed: moulding of a composition of existing engravings (2 fonts to choose from)

A hand is shown using a stamp on a wooden block. The stamp has a circular design with the letters 'NF' inside. The block has a similar design stamped on it.

ABCD 123

narrow, height of characters: 5,8,10,15,20,25,25,30,40,45 mm

ABCD 12

egra, height of characters: 10,15,20,25,30,35 mm

- Engraved: Moulding of an engraving to be executed from a computer file or drawing.

Our integrated execution studio, equipped with CAD graphics workstations, can also be used for your projects.

Stamps on dural mount

They have food conformance. They're resuming the characteristics of stamps on wooden frames and engraved.

Stamps mounted on canvas

These flexible stamps are mounted on a fabric that ensures dimensional stability and allows them to be fixed to a drum or marking plate by simple gluing. These stamps are based on the technical characteristics of composite and engraved stamps, mounted on wood or dural. They are available in the same styles and heights. Their thickness varies.

thickness in mm	character height
3,2	20 - 30 - 40 - 50 mm
5	5 to 40 mm
7	5 to 80 mm
9	5 to 100 mm
11	5 to 200 mm
13	5 à to 200 mm

To improve the quality of the marking, we offer, on request, variable hardness and a foam sheet inserted between the canvas and the stamp.
