Stencils

A large, square metal stencil plate is shown on a light-colored wooden surface. The plate features a large, circular logo in the center with the letters 'NF' inside. To the right of the logo, there are two smaller rectangular stencils stacked vertically, labeled 'B' and '40'. In the bottom left corner, there is a single rectangular stencil labeled '126'. The stencils are made of a dark material, possibly metal or plastic, and are designed for use in a printing or marking process.

A photograph showing a variety of small, miscellaneous items arranged on a plain, light-colored surface. At the top center is a yellow box labeled "Les Fraises de France" featuring a picture of a raspberry tart. Below it are numerous small metal components: a cylindrical tin can with a red label, a brass-colored circular object, a small white cube with black dots, a wooden block, and many tiny screws, bolts, and washers. A few small wooden blocks with letters like 'B' and 'V' are also visible. The overall scene suggests a collection of spare parts or a kit.

Hot marking equipment

- Electrical equipment

6 devices of different sizes with interchangeable engravings for burning of all materials.
