

Screen printing

Material

Unitex

The Unitex is manual screen printing table station dedicated to screen print on various textiles. The screen format size will be from 30 x 40 cm to 60 x 80 cm max.

The printing station is ready to assemble. It is composed of a bolted base in galvanized iron and must be screwed on a workbench or a table. The base and the printing head stand together. The frame will be inserted by the back of the printing head in the clamping jaws.

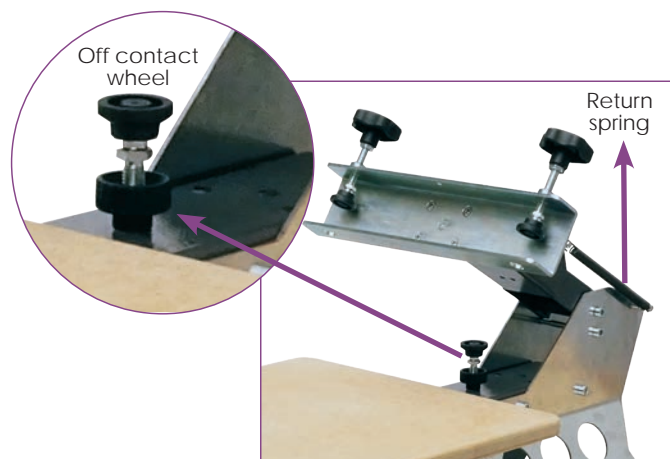

And it will be perfectly maintain thanks to 2 thumbing screws with large plastic collar.

While assembling the Unitex, the alignment and off contact of the printing head can be adjusted from the pallet.

In each Unitex pack we supply a medium size wooden pallet. However a large range of sizes pallets is currently available including additional models in stratified white wood.

The adjustment of the off contact will be quite easy to carry on thanks to a special thumb wheel mounted on the arm of the pallet.

A return spring will maintain the printhead on high position while raising the frame.

Thanks to the Omega fastening system, the pallet can be slid over the entire length of the pallet holder.

Two blocking screws will ensure the locking of the pallet in working position.

The Unitex is a functional and easy printing for advanced user or beginner who wishes to start learning textile screen printing.

UNITEX			Ref. 2362410	
MECHANICAL FEATURES			Ref. Medium Pallet	Ref. Stratified Pallet
External screen dimensions	mini	300 x 400 mm	Standard	Option
